

RECEIVED
CENTRAL FAX CENTERIN THE CLAIMS:

MAR 01 2007

Please amend Claim 36 and please add new Claims 44-53 as provided in the following Listing of Claims:

Listing of Claims:

Claim 21. (Previously Presented) An apparatus, comprising:

a shipment conveyance device, wherein the shipment conveyance device is associated with a shipment, and further wherein the shipment conveyance device is at least one of a shipping container, a pallet, and a tote;

a memory device, wherein the memory device is located in, on, or at, the shipment conveyance device, wherein information regarding the shipment is stored in the memory device, and further wherein the information regarding the shipment includes a description of a good, product, or item, being shipped via the shipment conveyance device, and at least one of origination information, sender information, shipper information, destination information, receiver information, handling instruction information, delivery instruction

information, invoice information, packing slip information, delivery time information, and payment instruction information, regarding the shipment;

a global positioning device, wherein the global positioning device is located in, on, or at, the shipment conveyance device, and further wherein the global positioning device determines a position or location of the shipment conveyance device;

a processing device, wherein the processing device processes at least one of information regarding the shipment and information regarding the shipment conveyance device in response to an occurrence of an event or in response to a request for information regarding the shipment or the shipment conveyance device, wherein the processing device generates a message containing information regarding the position or location of the shipment conveyance device and information regarding at least one of the occurrence of an event, a status of the shipment, a shipment temperature, and an impact or force on the shipment conveyance device; and

a transmitter, wherein the transmitter is located in, on, or at, the shipment conveyance device, wherein the

transmitter transmits the message to a communication device associated with at least one of an individual or entity, a sender of the shipment, a receiver of the shipment, a carrier of the shipment, and an individual or entity authorized to receive information regarding the shipment or the shipment conveyance device.

Claim 22. (Previously Presented) The apparatus of Claim 21, further comprising:

a display device, wherein the display device is located in, on, or at, the shipment conveyance device, wherein the display device displays or provides information regarding the shipment.

Claim 23. (Canceled)

Claim 24. (Previously Presented) The apparatus of Claim 21, further comprising:

a receiver, wherein the receiver receives the request for information regarding the shipment or the shipment conveyance device.

Claim 25. (Canceled)

Claim 26. (Canceled)

Claim 27. (Previously Presented) The apparatus of
Claim 21, wherein the message contains information regarding a
stop made by a carrier of the shipment or the shipment
conveyance device.

Claim 28. (Previously Presented) The apparatus of
Claim 21, further comprising:

a sensor, wherein the sensor monitors or measures
at least one of a temperature during the shipment, a shock
exerted on the shipment conveyance device, an impact exerted
on the shipment conveyance device, and a force exerted on the
shipment conveyance device,

wherein the message contains information
regarding at least one of a temperature of the shipment, a
change in a shipment temperature, and an impact or force
exerted on the shipment conveyance device.

Claim 29. (Previously Presented) The apparatus of
Claim 21, wherein the message contains information regarding
an unusual stopping period regarding the shipment.

Claim 30. (Previously Presented) The apparatus of
Claim 21, wherein the processing device is programmed to
automatically generate the message.

Claim 31. (Previously Presented) The apparatus of
Claim 21, wherein the processing device generates a shipment
delivery message, and further wherein the apparatus transmits
the shipment delivery message to the communication device.

Claim 32. (Previously Presented) The apparatus of
Claim 21, wherein the event is a detection of a deviation from
a pre-determined transportation route associated with the
shipment.

Claim 33. (Previously Presented) The apparatus of
Claim 21, wherein the event is a detection of an unauthorized
carrier or a wrong carrier transporting the shipment or the
shipment conveyance device or a detection of an unauthorized
receiver of the shipment or the shipment conveyance device or

a wrong receiver of the shipment or the shipment conveyance device.

Claim 34. (Previously Presented) The apparatus of Claim 21, wherein the event is a detection of a shipment temperature which deviates from a shipment temperature requirement.

Claim 35. (Previously Presented) The apparatus of Claim 21, wherein the event is a detection of at least one of an impact experienced by the shipment conveyance device, a force experienced by the shipment conveyance device, a mishandling of the shipment conveyance device, a dropping of the shipment conveyance device, and an accident involving the shipment conveyance device.

Claim 36. (Currently Amended) The apparatus of Claim 21, further comprising:

~~an input device for inputting, wherein the input device is located in, on, or at, the shipment conveyance device, wherein the input device is used to enter information regarding a person or entity attempting to receive the shipment or the shipment conveyance device,~~

wherein the processing device processes the information regarding a person or entity attempting to receive the shipment or the shipment conveyance device and determines whether or not the person or entity is a proper receiver of the shipment or the shipment conveyance device.

Claim 37. (Previously Presented) The apparatus of Claim 21, wherein the processing device detects an occurrence giving rise to an insurance claim regarding the shipment, and further wherein the message includes insurance claim information.

Claim 38. (Previously Presented) The apparatus of Claim 21, wherein the message is transmitted on or over at least one of the Internet and the World Wide Web.

Claim 39. (Previously Presented) The apparatus of Claim 21, wherein the shipping container is at least one of a refrigerated container, a heated container, and an insulated container.

Claim 40. (Previously Presented) The apparatus of Claim 21, wherein the communication device is at least one of a wireless device and a personal digital assistant.

Claim 41. (Previously Presented) An apparatus,
comprising:

a shipment conveyance device, wherein the shipment
conveyance device is at least one of a shipping container, a
pallet, and a tote;

a memory device, wherein the memory device is
located in, on, or at, the shipment conveyance device, wherein
information regarding a shipment is stored in the memory
device, and further wherein the information regarding a
shipment includes a description of a good, product, or item,
being shipped via the shipment conveyance device, and at least
one of origination information, sender information, shipper
information, destination information, receiver information,
handling instruction information, delivery instruction
information, invoice information, packing slip information,
delivery time information, and payment instruction
information, regarding the shipment;

a global positioning device, wherein the global
positioning device is located in, on, or at, the shipment
conveyance device, and further wherein the global

positioning device determines a position or location of the shipment conveyance device;

a processing device, wherein the processing device is located in, on, or at, the shipment conveyance device, wherein the processing device processes information regarding the shipment conveyance device in response to an occurrence of an event or in response to a request for information regarding the shipment conveyance device, wherein the processing device generates a message containing information regarding the position or location of the shipment conveyance device and information regarding at least one of the occurrence of an event, a status of the shipment, a shipment temperature, and an impact or force on the shipment conveyance device; and

a transmitter, wherein the transmitter is located in, on, or at, the shipment conveyance device, wherein the transmitter transmits the message to a communication device associated with at least one of an individual or entity, a sender of the shipment, a receiver of the shipment, a carrier of the shipment, and an individual or entity authorized to receive information regarding the shipment or the shipment conveyance device.

Claim 42. (Previously Presented) The apparatus of Claim 21, wherein the message contains at least one of information regarding a description of a good, product, or item, being shipped via the shipment conveyance device, origination information regarding the shipment, sender information regarding the shipment, shipper information regarding the shipment, destination information regarding the shipment, receiver information regarding the shipment, handling instruction information regarding the shipment, delivery instruction information regarding the shipment, invoice information regarding the shipment, packing slip information regarding the shipment, delivery time information regarding the shipment, and payment instruction information regarding the shipment.

Claim 43. (Previously Presented) The apparatus of Claim 21, wherein the apparatus stores at least one of information regarding a temperature requirement regarding the shipment, digitized map information, information regarding a stop or stops made during a transport of the shipment, and travel route information regarding the shipment.

Claim 44. (New) An apparatus, comprising:

a shipping container, wherein the shipping container is associated with a shipment;

a memory device, wherein the memory device is located in, on, or at, the shipping container, wherein information regarding the shipment is stored in the memory device, and further wherein the information regarding the shipment includes a description of a good, product, or item, being shipped via the shipping container, and at least one of origination information, sender information, shipper information, destination information, receiver information, handling instruction information, delivery instruction information, invoice information, packing slip information, delivery time information, and payment instruction information, regarding the shipment;

a global positioning device, wherein the global positioning device is located in, on, or at, the shipping container, and further wherein the global positioning device determines a position or location of the shipping container;

a processing device, wherein the processing device processes at least one of information regarding the shipment and information regarding the shipping container in

response to an occurrence of an event or in response to a request for information regarding the shipment or the shipping container, wherein the processing device generates a message containing information regarding the position or location of the shipping container and information regarding at least one of the occurrence of an event, a status of the shipment, a shipment temperature, and an impact or force on the shipping container; and

a transmitter, wherein the transmitter is located in, on, or at, the shipping container, wherein the transmitter transmits the message to a communication device associated with at least one of an individual or entity, a sender of the shipment, a receiver of the shipment, a carrier of the shipment, and an individual or entity authorized to receive information regarding the shipment or the shipping container.

Claim 45. (New) The apparatus of Claim 44, further comprising:

a display device, wherein the display device is located in, on, or at, the shipping container, wherein the display device displays or provides information regarding the shipment or the shipping container.

Claim 46. (New) The apparatus of Claim 44, wherein the message contains information regarding a stop made by a carrier of the shipment or the shipping container.

Claim 47. (New) The apparatus of Claim 44, further comprising:

a sensor, wherein the sensor monitors or measures at least one of a temperature during the shipment, a shock exerted on the shipping container, an impact exerted on the shipping container, and a force exerted on the shipping container,

wherein the message contains information regarding at least one of a temperature of the shipment, a change in a shipment temperature, and an impact or force exerted on the shipping container.

Claim 48. (New) The apparatus of Claim 44, wherein the message contains information regarding an unusual stopping period regarding the shipment or the shipping container.

Claim 49. (New) The apparatus of Claim 44, wherein the event is a detection of a deviation from a pre-determined

transportation route associated with the shipment or the shipping container.

Claim 50. (New) The apparatus of Claim 44, wherein the event is a detection of an unauthorized carrier or a wrong carrier transporting the shipment or the shipping container or a detection of an unauthorized receiver of the shipment or the shipping container or a wrong receiver of the shipment or the shipping container.

Claim 51. (New) The apparatus of Claim 44, wherein the event is a detection of a shipment temperature which deviates from a shipment temperature requirement.

Claim 52. (New) The apparatus of Claim 44, wherein the event is a detection of at least one of an impact experienced by the shipping container, a force experienced by the shipping container, a mishandling of the shipping container, a dropping of the shipping container, and an accident involving the shipping container.

Claim 53. (New) The apparatus of Claim 44, wherein the message is transmitted on or over a wireless communication

network or on or over at least one of the Internet and the
World Wide Web.
